Yes, looked to be some construction and certainly plans for more. Probably worth an inspection, (but I'm not sure there would be any actual discharge though)

John,
Did you happen to notice if there was any active construction going on at the subdivision?
Worth a construction inspection?
The construction permit has been open for 16 years and only 150 of 500 homes are built

Gavin

Hi Gavin, thanks for your help on this ~ just to close the loop, I found no issues and a nice treatment plant. Odors weren't that bad, but they really should upgrade their odor-control unit since they are right next to a beach park and their own golf course.

Hmmm. Is that just a guilty conscience and great interview skills

That being said spills to ground should be reported to the waste water branch.

Good job

Thanks – had an interesting conversation w facilities mgr. Turns out they have a pressurized/grinder pump system and force mains. When I called to say I was following up on a complaint, he immediately went into details of todays sewage spill (which of course I just let him go on about...) so interesting. Was just a few hundred gallons contained in a construction ditch, but still, I like the idea of cold-calling from EPA and getting confessions!

John
HIR10C202 The Shores at Kohanaiki
Has been on the books since 2005
The permit is so old that I cant find any real indication of where the boundries of the site are (was probably on a paper application in 2004)

I have included the most recent NGPC and the NOI attached for you reference (contact info in the NOI)
NOI was submitted by

Cert Person

Authorized Rep

Work Phone: (949) 768-2511	

We have never done any inspections of the Site or received any complaints about it
If it looks bad....or if you just see construction activity let us know we can go this year. Still looking for sites on the Big Island

Good luck
LMK if you need anything else

They will show on the QNCR but they are not highlighted to be resolved.

Hi John,

The violation code C10 and C20 is only an indication that their "Schedule Event Reported Late" (C10) and "Schedule Event Achieved Late but Reported" (C20). They cannot be resolved if in reality they were late in reporting. It would be more concerning if they did not report (C40).

This screen shot indicates that they should have "Achieve Final Compliance with All Obligation" on 6/30/2018 but they were late and reported on 11/27/2018.

Hi Sandra,

Looking for some help on the QNCR old data cobwebs....

For HI 0021377 Hilo WWTP:

There are 2 "Schedule Violations" for

1 A CS031 Achieve Final Compliance With All Obligations Under This order
with Violations Code C10 and C20.

There is no RNC detection Code, and the system won't let me make any changes. These were back in 2018, (I was able to resolve the other schedule violations several years ago), but these seem to be popping up still in ECHO due to the violations code I guess. Any help would be appreciated! Thank you very much
